Choice of Base

Choosing a right base is as important as selecting the mattress. We strongly recommend you to opt for Simmons bases to match your preferred Simmons mattress. A foundation box or bedframe will provide a firmer feel to the mattress, while a boxspring will offer a softer feel as the springs inside do add bounce. Also, bases should be changed when the mattress is changed to ensure a consistent performance.

DON'TS:

- Avoid slate-based foundations as it will invalidate the mattress warranty once the Pocketed Coils® are caught in-between the slates, which may eventually cause a sag in the mattress.
- Avoid placing mattress on the floor for ergonomic reasons and to ensure proper back support.

Tested, Proven And Made to Last

Simmons mattresses are tested with the strictest of industrial standards to ensure they withstand both time and extensive usage. The Cornell University Indentation Test ensure that the mattresses withstand exceptional durability, while the 240-pound steel drum rollator test attests to their structural integrity and stability.
